Why Hyper Open Cloud?

8 common traps

1. Overpricing ⚠️
2. Lock-in ⚠️
3. Disasters ⚠️
4. Bugs ⚠️
5. Backdoors ⚠️
6. Incompatibilities ⚠️
7. Obsolescence ⚠️
8. Tying ⚠️

# What is Hyper Open Cloud?

Open Source — everything incl. NOS & OSS/BSS

Open Hardware

Open Service — new

Open Service Definition

0 The freedom to use the service as they wish, for any purpose

1 The freedom to study how the service is provided
Full access to the service operation procedures, management documentation, bill of materials, list of outsourcers and ability to audit service operation are a precondition for this.

2 The freedom to copy the service operation procedures, management documentation, bill of materials and list of outsourcers to help others
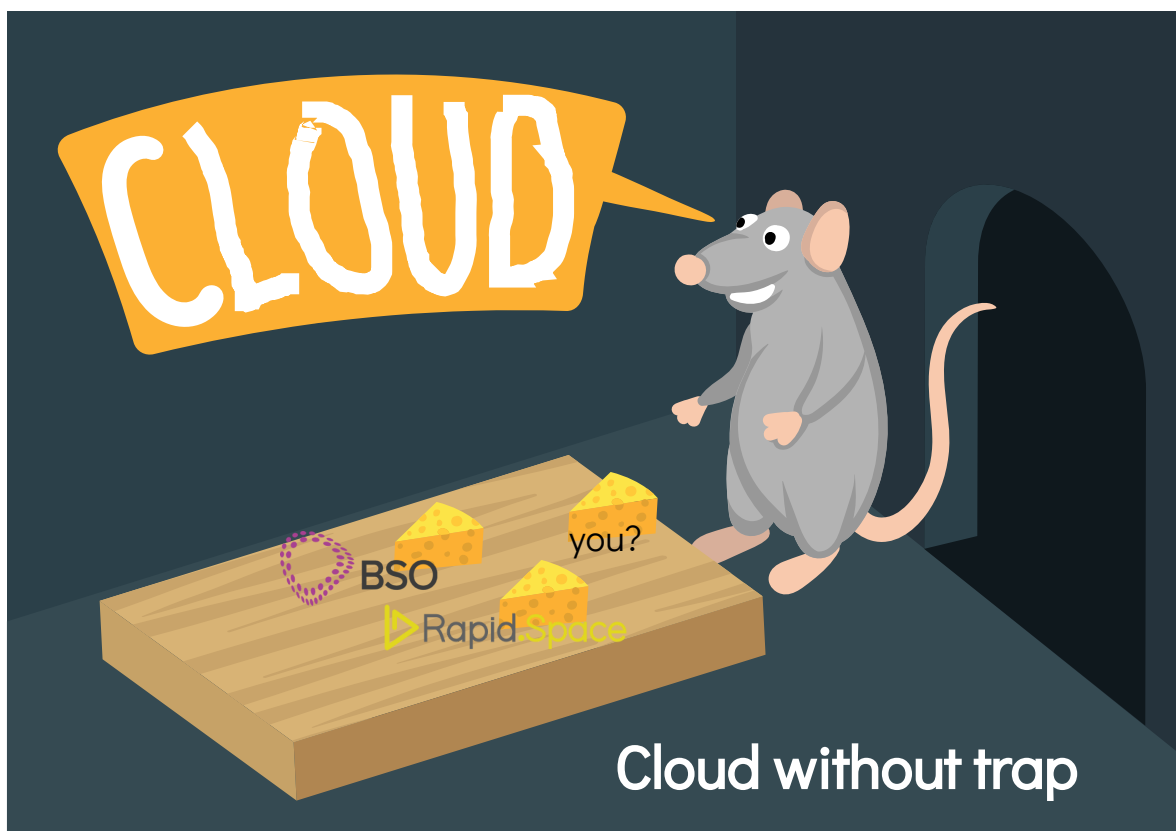

3 The freedom to operate modified or unmodified service and provide it to others
Ability to purchase the same materials and same outsourced services is a precondition for this.

How is Hyper Open Cloud useful?
